

A DIRTY DOZEN CLUSTER MUNITIONS

Human Rights Watch believes that all inaccurate and unreliable cluster munitions should be prohibited. The dirty dozen below are not the only objectionable types of cluster munitions but are singled out because they are either among the most widely used, have caused the most civilian harm, or pose the greatest threat to civilians due to their high failure rates and inaccuracy.

| <ul style="list-style-type: none"> All states should support the Norwegian-led initiative to develop urgently a legally binding international agreement to prohibit cluster munitions that cause unacceptable humanitarian harm. Pending conclusion of a new treaty, states should immediately adopt a national moratorium on use, production and trade of cluster munitions and/or take other steps at the national level to mitigate the negative humanitarian impact of cluster munitions. Use of cluster munitions in or near populated areas should be prohibited. Use, production and trade of unreliable and inaccurate cluster munitions should be prohibited, and existing stockpiles should be destroyed. Post-conflict measures should be strengthened. Cluster munition users should accept responsibility for clearance, risk education, provision of information, and victim assistance. | | <p>Examples of Policy and Practice</p> <ul style="list-style-type: none"> Norway is taking the lead in organizing an international process to develop a treaty to prohibit cluster munitions that cause unacceptable humanitarian harm. Belgium adopted legislation banning cluster munitions, which entered into force on June 9, 2006. Actions to prohibit or restrict cluster munitions have been introduced in the parliaments of Australia, Austria, Denmark, France, Germany, Italy, Luxembourg, Netherlands, Sweden, Switzerland, UK, and the US. The European Parliament in December 2001 adopted a resolution calling upon CCW States Parties to declare an immediate moratorium until an international agreement has been negotiated on the regulation, restriction or banning of the use, production and transfer of cluster munitions. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| <p>Declaration on Cluster Munitions made by States at the Third Review Conference of the Convention on Conventional Weapons (CCW) CCW/CONF.III/WP.18; November 20, 2006</p> <p>“Call for an agreement that should inter alia: (a) prohibit the use of cluster munitions within concentrations of civilians; (b) prohibit the development, production, stockpiling, transfer and use of cluster munitions that pose serious humanitarian hazards because they are for example unreliable and/or inaccurate; (c) assure the destruction of stockpiles of cluster munitions that pose serious humanitarian hazards because they are for example unreliable and/or inaccurate, and in this context establish forms for cooperation and assistance.”</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| <p>CCW Protocol V on Explosive Remnants of War (ERW) Entered into force on November 12, 2006.</p> <p>Ratified by 30 states as of February 16, 2007:</p> <p>Albania, Australia, Bulgaria, Croatia, Czech Republic, Denmark, El Salvador, Estonia, Finland, France, Germany, Holy See, Hungary, India, Ireland, Liberia, Liechtenstein, Lithuania, Luxembourg, Malta, Netherlands, Nicaragua, Norway, Sierra Leone, Slovakia, Spain, Sweden, Switzerland, Tajikistan, and Ukraine.</p> | | <p>A Common Understanding of Cluster Munitions Introduced by Germany CCW/GGE/XIII/WG.1/WP.10, March 8, 2006.</p> <ul style="list-style-type: none"> Cluster munitions means a munition which contains submunitions with explosives. These are deployed by means of delivery and are designed to detonate on impact with a statistical distribution in a pre-defined target area. Cluster munition delivery means include artillery shells, missiles or aircraft. The characteristics of cluster munitions are a lack of an autonomous target detection capability and a unusually high number of dangerous duds that pose serious humanitarian concerns after the use. The term “cluster munitions” does not cover direct-fire munitions, flares and smoke ammunition, sensor-fused ammunition with an autonomous target detection capability, submunition without explosives, and landmines. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| <p>Countries that Produce Cluster Munitions (34)</p> <table border="0"> <tr> <td>Argentina</td> <td>Germany</td> <td>South Korea</td> <td>Slovakia</td> <td rowspan="14"> <ul style="list-style-type: none"> Germany announced in June 2006 that it will not procure any new cluster munitions and will examine whether its existing cluster munitions can be entirely replaced by alternative munitions. Argentina, Denmark, Germany, Norway, and Switzerland have stated that they will not procure, and in some cases use, cluster munitions that have a hazardous dud rate of greater than one percent and will not use those without the capacity to self-destruct or self-neutralize. The UK announced in March 2005 that it would implement a similar policy by 2015. Poland, South Africa, and the US have announced national policies for the future procurement of cluster munitions that establish a minimum submunition reliability rate. KBC Bank in Belgium has disinvested in the following publicly-traded companies because of their involvement in the production of cluster munitions: Aerostar, Alliant Techsystems, Aselsan, BAE Systems, European Aeronautic Defense and Space (EADS), Finmeccanica, GenCorp, General Dynamics, Honeywell International, L-3 Communications, Lockheed Martin, Magellan Aerospace, Northrop Grumman, Poongsan, Raytheon, Rheinmetall, and Thales. </td> </tr> <tr> <td>Belgium</td> <td>Greece</td> <td>Netherlands</td> <td>South Africa</td> </tr> <tr> <td>Brazil</td> <td>India</td> <td>Pakistan</td> <td>Spain</td> </tr> <tr> <td>Bulgaria</td> <td>Iran</td> <td>Poland</td> <td>Sweden</td> </tr> <tr> <td>Canada</td> <td>Iraq</td> <td>Romania</td> <td>Switzerland</td> </tr> <tr> <td>Chile</td> <td>Israel</td> <td>Russia</td> <td>Turkey</td> </tr> <tr> <td>China</td> <td>Italy</td> <td>Serbia</td> <td>UK</td> </tr> <tr> <td>Egypt</td> <td>Japan</td> <td>Singapore</td> <td>US</td> </tr> <tr> <td>France</td> <td>North Korea</td> <td></td> <td></td> </tr> </table> | | | | | Argentina | Germany | South Korea | Slovakia | <ul style="list-style-type: none"> Germany announced in June 2006 that it will not procure any new cluster munitions and will examine whether its existing cluster munitions can be entirely replaced by alternative munitions. | TIMELINE OF CLUSTER MUNITION USE | | |
|----------------------------------|-------------------------------|---|
| Date | Location | Details |
| 1943 | USSR | Soviet forces use air-dropped cluster munitions against German armor. German forces use SD-1 and SD-2 butterfly bombs against artillery on the Kursk salient. |
| 1943 | United Kingdom | German aircraft drop over 1,000 SD-2 butterfly bombs on the port of Grimsby. |
| 1960s-1970s | Cambodia, Laos, Vietnam | US forces make extensive use of cluster munitions in bombing campaigns. The ICRC estimates that in Laos alone, 9 to 27 million unexploded submunitions remain, and some 11,000 people have been killed or injured, of which more than 30 percent have been children. An estimate based on US military databases states that 9,500 sorties in Cambodia delivered up to 87,000 air-dropped cluster munitions. |
| 1973 | Syria | Israel uses air-dropped cluster munitions against non-state armed group (NSAG) training camps near Damascus. |
| 1975-1988 | Western Sahara | Moroccan forces use cluster munitions against NSAG. |
| 1978 | Lebanon | Israel uses cluster munitions in southern Lebanon. |
| 1979-1989 | Afghanistan | Soviet forces make use of air-dropped and rocket-delivered cluster munitions. NSAG also use rocket-delivered cluster munitions on a smaller scale. |
| 1982 | Lebanon | Israel uses cluster munitions against Syrian forces and NSAG in Lebanon. |
| 1982 | Falkland Islands (Malvinas) | UK aircraft drop cluster munitions on Argentinean infantry positions near Port Stanley, Port Howard, and Goose Green. |
| 1986 | Chad | French aircraft drop cluster munitions on a Libyan airfield at Wadi Doum. |
| 1991 | Iraq, Kuwait, Saudi Arabia | The US and its allies (France, Saudi Arabia, UK) drop 61,000 cluster bombs, containing some 20 million submunitions. The number of cluster munitions delivered by surface-launched artillery and rocket systems during the Gulf War is not known, but one source estimates that over thirty million DPICM submunitions were used in the conflict. |
| 1992-1995 | Bosnia and Herzegovina | Forces of Yugoslavia and NSAG use available stocks of cluster munitions during civil war. |
| 1992-1997 | Tajikistan | Use by unknown forces in civil war. |
| 1994-1996 | Chechnya | Russian forces use cluster munitions against NSAG. |
| 1995 | Croatia | On May 2-3, 1995, an NSAG uses Orkan M-87 multiple rocket launchers to attack civilians in Zagreb. Additionally, the Croatian government claimed that Serb forces used BL-755 bombs in Sisak, Kutina, and along the Kupa River. |
| 1996-1999 | Sudan | Sudanese government forces use air-dropped cluster munitions in southern Sudan. |
| 1997 | Sierra Leone | Nigerian ECOMOG peacekeepers use Beluga bombs on the eastern town of Kenema. |
| 1998 | Ethiopia / Eritrea | Ethiopia and Eritrea exchange aerial cluster munition strikes, Ethiopia attacking the Asmara airport and Eritrea attacking the Mekele airport. Ethiopia also dropped BL-755 bombs in Gash-Barka province of western Eritrea. |
| 1998-1999 | Albania | Yugoslav forces launch cross-border rocket attacks and NATO forces carry out six aerial cluster munition strikes. |
| 1999 | Yugoslavia (including Kosovo) | The US, UK, and Netherlands drop 1,765 cluster bombs, containing 295,000 bomblets. |
| 2001-2002 | Afghanistan | The US drops 1,228 cluster bombs containing 248,056 bomblets. |
| 2003 | Iraq | The US and UK use nearly 13,000 cluster munitions containing an estimated 1.8 to 2 million submunitions in the three weeks of major combat. |
| 2006 | Lebanon | Israeli forces use surface-launched and air-dropped cluster munitions against Hezbollah. The UN estimates that Israel used up to 4 million submunitions. |
| 2006 | Israel | Hezbollah fires over 100 Chinese-produced Type-81 122mm cluster munition rockets into northern Israel. |

In addition, unconfirmed reports cite use of cluster munitions in Angola, Colombia, Kashmir, Nagorno-Karabakh, Pakistan, Sri Lanka, Turkey, and Yemen.
